

# Olinda Elementary School Multi-Purpose Room Project Updates

8/31/2017

As many of you can see, the construction of the Multi-Purpose Room has started. Mobilization and construction activities began in late June. The project is scheduled to be completed and ready to open for the 2018-19 school year.

As of today, all of the underground electrical, sewer and irrigation has already been installed. Currently the deep underground work for the footings and foundation have begun over the next two weeks we should have the foundation poured. Here are some pictures of some of the progress we have made.

*Pictures of the reinforcement needed for the foundation footings.*
